CONTENTS

VOLUME 12, 1945

AGNEW, RALPH PALMER. Abel transforms of Tauberian series 27
BECKENBACH, E. F., AND READE, MAXWELL. Regular solids and harmonic polynomials 629
BEESLEY, E. M., AND MORSE, A. P. φ-Cantorian functions and their convex moduli 585
BISSINGER, B. H., AND HERZOG, F. A generalization of Borel's and F. Bernstein's theorems on continued fractions 325
BISSINGER, B. H., AND HERZOG, F. An extension of some previous results on generalized continued fractions 655
BOAS, R. P., JR. Functions of exponential type, V 561
BOAS, R. P., JR., AND KAC, M. Inequalities for Fourier transforms of positive functions 189
BOBROFF, A. A. Conditions of applicability of the strong law of large numbers 43
BRUNK, H. D. Theorems of composition for Dirichlet series 1
CAMERON, R. H. Some examples of Fourier-Wiener transforms of analytic functionals 485
CAMERON, R. H., AND MARTIN, W. T. Fourier-Wiener transforms of analytic functionals 489
CATON, W. B., AND HILLE, E. Laguerre polynomials and Laplace integrals. 217
CHANG, SU-CHENG. A generalization of the sextactic point of a plane curve. 275
CHENG, MIN-TEH. The super-absolute Cesàro summability of Fourier series 409
CHERN, SHIING-SHEN. Some new characterizations of the Euclidean sphere 279
DENNIS, JOSEPH J., AND WALL, H. S. The limit-circle case for a positive definite J-fraction 255
FINAN, E. J. Cyclic subsets of a group 509
FOSTER, ALFRED L. The idempotent elements of a commutative ring form a Boolean algebra; ring-duality and transformation theory 143
GARCÍA, MARIANO. Orbit-components and component orbits 473
HERZOG, F., AND BISSINGER, B. H. A generalization of Borel's and F. Bernstein's theorems on continued fractions 325
HERZOG, F., AND BISSINGER, B. H. An extension of some previous results on generalized continued fractions 655
HILLE, E., AND CATON, W. B. Laguerre polynomials and Laplace integrals. 217
HSIUNG, CHUAN-CHIH. A projective invariant of a certain pair of surfaces. 441
HSIUNG, CHUAN-CHIH. New geometrical characterizations of some special conjugate nets 249

JAMES, R. C. Orthogonality in normed linear spaces 291
JEFFERY, R. L., AND MILLER, D. S. Convergence factors for generalized integrals 127
JONES, ALFRED W. The lattice isomorphisms of certain finite groups 541
JUNCOSA, MARIO L. An integral equation related to Bessel functions 465
KAC, M., AND BOAS, R. P., JR. Inequalities for Fourier transforms of positive functions 189
KAPLANSKY, IRVING. Maximal fields with valuations, II 243
LANE, RALPH E. The value region problem for continued fractions 207
LEVINSON, NORMAN. Corrections to "Gontcharoff polynomials" 335
LEWIS, J. V. The existence of solutions to Lagrange problems for multiple integrals 705
LOO, CHING TSÜN. The absolute summability of power series 373
MCCOY, NEAL H. Subdirectly irreducible commutative rings 381
MAHLER, K. A theorem of B. Segre 367
MARTH, ELLA. Further properties of Garvin's F-series 645
MARTIN, W. T., AND CAMERON, R. H. Fourier-Wiener transforms of analytic functionals 489
MILLER, D. S., AND JEFFERY, R. L. Convergence factors for generalized integrals 127
MORSE, A. P., AND BEESLEY, E. M. φ-Cantorian functions and their convex moduli 585
MOURSUND, A. F. Non-summability of the conjugate series of the Fourier series 515
O'NEILL, ANNE F. Contributions to the theory of derivates 89
PALL, G., AND WILLIAMS, CHRISTINE S. The thirty-nine systems of quaternions with a positive norm-form and satisfactory factorability .. 527
PARKER, W. V. The characteristic roots of matrices 519
PIERCE, JESSE. Solutions of systems of differential equations in the vicinity of branch points of the solutions, III 37
POLLARD, HARRY. Sequences with vanishing even differences 303
READE, MAXWELL, AND BECKENBACH, E. F. Regular solids and harmonic polynomials 629
REES, C. J. Elliptic orthogonal polynomials 173
REID, W. T. Integral criteria for solutions of linear differential equations. 685
ROBERTSON, M. S. Star center points of multivalent functions 669
SALEM, R. Power series with integral coefficients 153
SALEM, R., AND ZYGMUND, A. Lacunary power series and Peano curves ... 569
SCHAEFFER, A. C., AND SPENCER, D. C. The coefficients of schlicht functions, II 107
SEGRE, B. Lattice points in infinite domains, and asymmetric Diophantine approximations 337

SPENCER, D. C., AND SCHAEFFER, A. C. The coefficients of schlicht functions, II 107
TRJITZINSKY, W. J. Integral equations in problems of representation of functions of a complex variable 419
VEST, M. L. Involutorial space transformations associated with a linear congruence 621
WADE, L. I. Post algebras and rings 389
WALL, H. S., AND DENNIS, JOSEPH J. The limit-circle case for a positive definite J-fraction 255
WANG, FU TRAING. Strong summability of Fourier series 77
WHITE, PAUL A. New types of regular convergence 305
WHITE, PAUL A. Regular transformations 101
WHYBURN, G. T. Boundary alternation of monotone mapping 663
WHYBURN, G. T. Uniqueness of the inverse of a transformation 317
WILKINS, J. E., JR. A special class of surfaces in projective differential geometry, II 397
WILLIAMS, CHRISTINE S., AND PALL, G. The thirty-nine systems of quaternions with a positive norm-form and satisfactory factorability 527
WINTNER, AUREL. A property of the elliptic modular net 451
WINTNER, AUREL. The linear difference equation of first order for angular variables 445
WINTNER, AUREL. The moment problem of enumerating distributions 23
ZORN, MAX A. Gâteaux differentiability and essential boundedness 579
ZYGMUND, A. A theorem on fractional derivatives 455
ZYGMUND, A. Smooth functions 47
ZYGMUND, A. The approximation of functions by typical means of their Fourier series 695
ZYGMUND, A., AND SALEM, R. Lacunary power series and Peano curves 569
